

# PUREVAX™ FELINE 3

## *Merial*

Vaccine

Feline Rhinotracheitis-Calici-Panleukopenia Vaccine, Modified Live Virus

**U.S. Vet. Lic. No.:** 298

**Description:** PUREVAX™ Feline 3 contains a lyophilized suspension of modified live feline rhinotracheitis, calici, and panleukopenia viruses, each propagated in a stable cell line, plus sterile water diluent. The safety and immunogenicity of this vaccine have been demonstrated by vaccination and challenge tests in susceptible cats.

Contains gentamicin as a preservative.

**Indications:** PUREVAX™ Feline 3 is recommended for the vaccination of healthy cats against disease caused by feline rhinotracheitis, calici, and panleukopenia viruses.

**Dosage and Administration:** Reconstitute the lyophilized vaccine with accompanying liquid diluent and aseptically inject 1 mL (1 dose) subcutaneously or intramuscularly into healthy cats. For primary vaccination, revaccinate with a second 1 mL dose 3 to 4 weeks later. Cats younger than 12 weeks of age should be revaccinated with a single 1 mL dose every 3 to 4 weeks, the last dose given at or over 12 weeks of age. Revaccinate annually with a single 1 mL dose.

**Precaution(s):** Store at 2-7°C (35-45°F). Use immediately after reconstitution. Do not use chemicals to sterilize syringes and needles. Burn this container and all unused contents.

**Caution(s):** It is generally recommended to avoid vaccination of pregnant cats. In rare instances, administration of vaccines may cause lethargy, fever, and inflammatory or hypersensitivity types of reactions. Treatment may include antihistamines, anti-inflammatories, and/or epinephrine.

Sold to veterinarians only.

**Warning(s):** For veterinary use only.

**Presentation:** Contains 25 doses: 25 x 1 dose, lyophilized and 25 x 1 mL, sterile water.
