

PUREVAX™ FELINE RABIES

Merial

Vaccine

Rabies Vaccine, Live Canarypox Vector

U.S. Vet. Lic. No.: 298

Description: PUREVAX™ Feline Rabies contains a nonadjuvanted lyophilized suspension of a recombinant vectored rabies vaccine plus a sterile water diluent. A canarypox vector has been modified, using recombinant technology, to produce expression of desired antigens capable of stimulating a protective immune response to rabies. Safety and immunogenicity of this vaccine have been demonstrated by vaccination and challenge studies in susceptible cats.

Contains gentamicin as a preservative.

Indications: PUREVAX™ Feline Rabies is recommended for the vaccination of healthy cats against rabies.

Dosage and Administration: Reconstitute the lyophilized vaccine with accompanying liquid diluent and aseptically inject 1 mL (1 dose) subcutaneously into healthy cats at 8 weeks of age or older. Revaccinate annually with a single 1 mL dose.

Precaution(s): Store at 2-7°C (35-45°F). Use entire contents immediately after reconstitution. Do not use chemicals to sterilize syringes and needles. Burn this container and all unused contents.

Caution(s): It is generally recommended to avoid vaccination of pregnant cats. In rare instances, administration of vaccines may cause lethargy, fever, and inflammatory or hypersensitivity types of reactions. Treatment may include antihistamines, anti-inflammatories, and/or epinephrine.

Sold to veterinarians only.

For veterinary use only.

Presentation: Contains 25 Doses: 25 x 1 Dose Lyophilized, 25 x 1 mL Liquid.
