

Vanguard[®] CIV

For vaccination of healthy dogs as an aid in the control of disease associated with canine influenza (H3N8) virus infection. Vanguard CIV has been demonstrated to reduce incidence and severity of lung lesions, and the incidence and duration of clinical coughing and viral shedding.

Directions: Vaccination of healthy dogs is recommended. Shake well. Aseptically administer 1 mL subcutaneously. Healthy dogs 8 weeks of age and older should receive 2 doses administered 3 weeks apart. Annual revaccination with a single dose is recommended.

Precautions: Store at 2°-7°C (35°-45°F). Prolonged exposure to higher temperatures may adversely affect potency. Do not freeze. Use entire contents when first opened. Sterilized syringes and needles should be used to administer this vaccine. Contains gentamicin as preservative.
